

Tuesday Evening, Nov. 3, 1858.

TOWN AND COUNTY.

LOCAL PLACES.—Voted! Vote!

November Court begins next Monday.

... The young wheat never looked handsomer in this country.

Mr. W. N. Miller has contracted to set two Dalmatian monuments at J. L. Daugherty's farm on the Westfield, to be dedicated next Sunday.

The President, Washington, did not pass through what is now Adams county during the "Whiskey Insurrection," set by a contractor on our first day.

We are very glad to say that Maria, daughter of Mr. George Myers, has entirely recovered from the pistol shot received some time ago.

The wound received from a dog bite by Mr. George Schlesser, of Mcmahan township, is healing and there is no further apprehension.

The barn of Mr. George Mehl, in Latham township, was destroyed by the Tuesday night fire.

Mr. John A. Grimes, Huntington township, has an old cabin of 1700.

Mr. George Cashman, of Steuben township, raised from two seeds six pumpkins, each weighing 383 pounds, the last seed.

Bigeville is to have a sash and door factory.

Interesting fruit notes on fourth page.

Mr. D. H. Seegerling brings in an ear of corn 11 inches long. Who can beat it?

She-banks bought in Gettysburg are getting quite a reputation in other places.

The winter may be long and dull. Read the Compiler and be happy.

A live ewe in York county weighs 9 pounds.

This long winter evenings suggest this as a specially fitting time to subscribe for the Compiler. Its great variety of useful and entertaining matter always makes it welcome at the fireside, as well as in the workshop and the place of business. All the departments will be maintained with care and completeness, and several series of contributions prepared for the Compiler exclusively will appear during the autumn and winter. Subscribe now. To pay in advance is to receive the premium book at once.

OVERSEAS.—The ladies of the Reformed Church Mite Society will give an Oyster Supper in the Opera House on Tuesday evening, Nov. 6th. Prime oysters and all the delicacies of the sea will be served. The public cordially invited.

A surprised Democratic meeting was held at the Globe Inn last evening. Dr. C. E. Schenk president, Sheriff Samuel H. Biddle and Dr. J. W. C. O'Neil vice-president, and T. J. Stahl secretary. C. S. Duncan, Esq., Wm. McSherry, Esq., Lewis Brouse, T. J. Stahl, John Holtzworth, Charles Ziegler and H. J. Stahl spoke.

NOTARY PUBLIC.—Guy Patterson has appointed Wm. Arch. McLean, Esq., a Notary Public for Gettysburg, in place of J. W. GAGLACH'S.

An exchange says that "diphtheria is desolating homes in Gettysburg and the surrounding country," which is news to us. Must be some other place, because Gettysburg never was healthier than now.

HIDES WANTING.—S. J. Codori will pay the highest cash price for County Hides, delivered at his place, Yorkstreet, Gettysburg.

For TRIMMINGS in different widths, Feather and Moss trimmings, swan's down, web hats, crests, etc., quilted satin lining at G. W. WEAVER & SON'S.

Nov. 3. 4.

NEW WRAPS.—Newmarket, new Capes, receiving every week at G. W. WEAVER & SON'S.

HANOVER genuine Buck Gloves \$1.00, and a full assortment of Men's Gloves, our own low prices.

13th G. W. WEAVER & SON.

POSTMASTER APPOINTED.—Daniel Miller, of New Chester; A. K. Peay, Chambers; L. W. Shantz, of the Rock; H. S. Swartz, at Shatzell; David A. Miller, Mount Holly Springs.

The Jacksonville (Ia.) Daily Journal, of Feb. 21st, 1858, says: "One of the largest audiences of the season gathered at the Opera House last night to see 'Percy's Bad Boy,' hit pi in the grecian. The house was crowded, which was an indication to the troupe to do their best. It was funny and interesting. Everybody laughed and enjoyed themselves. The show was interspersed with many new features and contained nothing objectionable. This was one of the shows which was success, and the Opera House management, the troupe and the people happy.

NEW RAILROAD.—Arrangements have been completed by the Gettysburg and Harrisburg Railroad Company to run a special market car through to Philadelphia, leaving Gettysburg every Monday and Thursday and reaching Philadelphia early next morning.

The people of this county have long felt the want of some such arrangement by which they could in this way exchange their produce, and the facilities thus offered will be greatly appreciated.

THE wedding of Miss Grace Roberts, daughter of Attorney General Roberts, of Westminster, and Mr. Charles Stewart, of Lancaster, will take place to-morrow.

Mr. L. G. Lawrence, of Hamilton township, has a fine colt by breeding in the stable last week.

FIRE.—Mr. Aaron Lewis, of Latham township, being informed that rabbits could be lawfully shot after October 15th, killed two, and was fined for killing game out of season." We have found it very difficult to keep track of the changes in the game laws.

GOOD LUCK.—Mr. George Baker, of East Berlin, caught with hook and line on Saturday week, 13 eels, 11 suckers, 1 bass, 9 sunfish and 1 catfish.

O. W. Good is building a four-story hotel in Waynesboro.

WARNER, BROWN & CO., of Chicago, propose also to publish history of Franklin county.

Dr. KATEL M. CHAPMAN of Fredericksburg, has removed to Chambersburg, where she will continue the practice of medicine.

Mr. HILLIAN G. GOOD, formerly of this county, has been appointed postmaster at Kistler, Perry county.

FERNAND WARD has been sent to the New York pantomime for ten years.

Write it to you, VOTE!

The INDIAN MONUMENTS.—The Indian veterans, last week, though not in very large numbers, included some of the most prominent gentlemen of that State. Some arrived on Tuesday and others on Wednesday, part via the G. & H. railroad and those from Washington over the H. J., H. & C. During Wednesday they visited the various monuments and described the positions and parts taken by the various commands in the battle. At the 3d Cavalry Cap, G. W. Studebaker, at the 10th, Sergt. W. D. Holtzworth; at the 20th, Capt. J. C. Brown; at the 27th, Gen. S. Colgate; and at the 4th, Capt. D. E. Bean. The locations and descriptions appeared in our last issue.

In the evening the visitors, escorted by the G. A. R. Band, marched to the Court-house and held a public meeting, on which Gen. Joseph J. Reynolds presided. The following comedies presented the respective monuments to the Battleground Memorial Association: 3d Cavalry, George W. Spangler, 10th Infantry, H. J. Studebaker; 27th, C. Brown; 4th, Capt. D. E. Bean; all of which were received by Secretary John M. Knauth, Esq. Addresses were also made by W. W. Dutcher, ex-Commissioner of Pensions, Gen. Silas Colgrove, Major and General W. H. C. Whiting, Capt. T. T. Trotter, Chaplain, Chaplain, Chaplain, and particularly Gen. D. E. Bean, or pay required to be paid to the post office, for the benefit of the伤兵.

The INDIAN MONUMENTS.—The corn crop is a huge one throughout this section, and there is still some to harvest.

Jacob Miller, of Mount Pleasant township, has painted the Indian monuments and the Indian figures in the Indian monuments.

Tuesday Evening, Nov. 3, 1865.

FRUIT NOTES.

Of the new S. Strawberries the Crescent seems to be first for relish, quality, and profit. A number is required for home use, and on strong, rich soils the Sweet Strawberries maintain high grade. Kentucky is still regarded as one of the best sorts. The Wilson continues to be preferred by some, but it is gradually passing away.

In Grapes the Delaware stands well for flavor, but is not so small; the Hartford, however, is well known because early and size. Salers is very good when well matured. Moore's early and Wards are the best of the earlier black grapes, and Chardonnay receives favor. The Niagara and Concord are excellent white grapes. The Lady is also a prominent white grape.

The following is transferred from the *Country Gentleman* to the Compiler because the editor thinks the information given is highly valuable:

NOTES ON APPLES AND PEARS.

The Yellow Transparent is an apple cultivated in Russia and has been grown in England for many years.

It was recently brought to this country where it has succeeded well, bearing an early crop.

It is two weeks earlier than the Red Astrachan, medium in size, and a better quality than the Early Harvest.

The Shannon apple originated in Ayrshire, and took the premium at the World's Exposition at New Orleans.

It is a very large full apple, very showy in appearance.

Some claim that it is

and others that it is not, of superior quality.

Lord Nelson is an English apple, and largely cultivated in England. It is very productive, yellow skin with red streaks, season November to January.

Kentish Filoliess is one of the largest apples I have ever seen. Its yellow skin with bright red stripes over the surface make a magnificent appearance, but it only medium in quality. This variety will prove exceedingly valuable for market.

The Fanny apple originated in Eastern Pennsylvania. Mr. Downing told me that he considered it the best of its season, which is the last of August.

It is a very large full apple, very showy in appearance.

Some claim that it is

and others that it is not, of superior quality.

The Duchess of Oldenburg is considered one of the best apples throughout the great northwest. I mention this for the reason that Prof. Budd and Peter M. Gideon consider it a typical hard apple. It is valuable in quality and appearance.

Round Sweet is one of the most valuable apples grown in the line of sweet apples. With it bears every year numerous crops of very large full apples, season from October to April, color yellow-green. This apple is generally classed as a full apple, but we have no difficulty in keeping it all winter. It has a peculiar flavor agreeable to all, either fresh or baked. Everybody should have a few trees of this variety.

PEAR growing is attracting more attention than formerly. It would seem to be almost as easy to grow pears as apples.

Champ's Favorite is doing very well with us, being a rapid grower, and bearing large crops of large red-skinned fruit.

Bartlett is always a favorite. They are raised upon to furnish an abundance of excellent fruit, trees coming in to bearing early.

W. D. Boynton.

The American Cultivator says: It seems to us that such of the washing manufacturers as are trying out for five years are not very satisfied. Once the bars are down in connection with tariff matters and free wool will end in free wool and the manufacturers are hardly ready for that. It is a difficult matter to arrange any modification of the tariff without trading upon somebody's cons.

Champ's Favorite is doing very well with us, being a rapid grower, and bearing large crops of large red-skinned fruit.

Bartlett is always a favorite. They are raised upon to furnish an abundance of excellent fruit, trees coming in to bearing early.

The Tyson is one of the most productive of all pears, and if one should shut his eyes when eating them, he might be pardoned for supposing he was eating a Seckel, so near does it approach that favorite.

Kieffer is an abundant bearer, and is of value only as a cooking pear.

The Le Conte is likewise of poor quality, and also an abundant bearer. In a recent conversation with a southern gentleman, I was informed that the Le Conte blossomed very early, and for this reason may possibly not be successful in the North, as the blossom may be liable to injury by late frosts.

The Comet (or Lawson) pear is one of the most beautiful in color of any that has been my pleasure to see this season. The quality is far superior to that of the Kieffer or Le Conte, but is not so good as we could desire. It is a very early pear, and it should not be criticised too severely.

Champ's Favorite is doing very well with us, being a rapid grower, and bearing large crops of large red-skinned fruit.

Bartlett is always a favorite. They are raised upon to furnish an abundance of excellent fruit, trees coming in to bearing early.

The Tyson is one of the most productive of all pears, and if one should shut his eyes when eating them, he might be pardoned for supposing he was eating a Seckel, so near does it approach that favorite.

Dash cold water into the ears of chocking cattle. This causes the animal to shake its head violently, and muscular action dislodges the obstruction.

This is the way in which milking is done on the Island of Jersey: Two buckets, narrow near the top, with wide mouths, are used. A linen cloth is tied over the top, then a smooth shell is pushed down in the depression to receive the milk. The shell prevents the wearing of the cloth by the streams of milk, and at the same time serves as a strainer.

LIKE HIS FATHER,

He was Afflicted With Stone in the Bladder, Mr. S. W. Hicks, of Pleasant Valley, Duquesne, came to see Dr. E. K. Eicholtz, who has a connection with an article similar to this, who is his father, afflicted with Stone in the Bladder, only that his case was more serious. Dr. E. K. Eicholtz, however, who is a man of much more than forty years, who has developed a dry, hacking cough, which is not only distressing to himself, but to his friends and those with whom he is brought into business contact. Last fall he was induced to try what virtue there was in common salt. He commenced using it three times a day—morning, noon, and night. We dissolved a large table spoonful of pure table salt in about half a small tumblerful of water. With this gargled the throat thoroughly, just before meal time. The result has been that during the entire winter we have not only free from coughs and colds, but the dry, hacking cough had entirely disappeared. We attribute these satisfactory results solely to the use of salt gargle, and most cordially recommend a trial of it to those who are subject to disease of the throat. Many persons who have not tried the salt gargle have the impression that it is unpleasant, but after a few days' use no person who loves a nice, clean mouth, and a first rate sharpener of the appetite will abstain from it.

TO CURE THE THROAT.—To give a gallon of water take one pound of salt and a half ounce of saltpetre. Boil these together until the salt comes to a boil. Skim as the sediment rises to the surface; then take it off and set it away to cool. When cold pour it over the meat. The meat will be sufficiently cured to use in eight or ten days. It may be kept for a week.

FOR SALE BY ALL DRUGGISTS.

SINSINN BLOWING.

We have but few hills that are not benefited by fall plowing. A very sandy soil should be kept as compact as possible through the greater part of the year. When air and spring especially are seasons of washing. A soil that is kept up in cultivation washes much worse than a soil that is left unbroken. The sandy soil can be but little benefited by fall plowing, even if there were no loss by washing. The object in fall plowing is to get the action of the frost on the surface of the surface. A soil that is already loose and open in its composition does not need this disintegrating action of the frost.

Loam clays, and even some of the better class of study loans, are greatly benefited by fall plowing. Any soil that is all inclined to break or become loamy will be benefited by fall plowing. This might be a good rule to go by. This loam contains much fertility that plants cannot get the benefit of, while at the same time they are an impediment to good cultivation.

Frost is a great fertilizer. It works alike for all, provided it is given an opportunity. Its expansive power throws apart the hardest soils, and renders available the plant food therein contained. It does work that no implement can do. It renders a raw soil soft, thrown up for treatment at its roots, fit for the habitation of plants.

From its effects on the soil, fall plowing has decided advantages. Plants are in a better condition, and consequently a better day's work can be done than in spring. The land is firm, yet moist enough to do good work, when in spring it will be soft and sticky. Plowing down in autumn is so much gained for spring, and forchandled. In this particular is often of great value to the farmer.

Plowing should not be done too early in autumn, for the land will get so overdone that a good deal of cultivation will be required to get it to a workable state. The depth of plowing must be governed by the character of the soil to a considerable extent. A deep soil should be plowed deep. The deeper the cultivation the better the drainage, and deep cultivation is a safeguard against death as well as good soil should gradually be brought to the surface, until at least 8 inches of good soil is obtained. For deep and furrowed soil, it is best to do the work in spring, when it gets a good deal of rain.

SIMMONS LIVER REGULATOR

symptoms

is generally used in the South to accuse the North of being a despotic, tyrannical, and avaricious people.

It is a very large full apple, very showy in appearance.

Some claim that it is

and others that it is not, of superior quality.
